

KOSMOS

NYSE: KOS

// WHO WE ARE //

A PASSION TO EXPLORE, A DRIVE TO PRODUCE

Kosmos Energy is a leading independent oil and gas exploration and production company focused on frontier and emerging areas along the Atlantic Margin. We are a team of oil finders with a record of exploration success around the world. We discovered the Jubilee Field in 2007, which opened the Tano Basin and established a new oil province offshore Ghana. More recently, we made several major natural gas discoveries offshore Mauritania and Senegal.

Our assets include existing production and development projects offshore Ghana, large discoveries and significant further hydrocarbon exploration potential offshore Mauritania and Senegal, as well as exploration licenses with significant hydrocarbon potential offshore São Tomé and Príncipe, Suriname, Morocco and Western Sahara.

With a strong balance sheet and a proven strategy built upon technical expertise, we are focused on discovering and developing high volume, high value hydrocarbons.

// STRATEGY //

VISIONARY. DISCIPLINED.

Kosmos strikes a new balance between risk and reward. We generate new exploration ideas and use them to capture large acreage positions in areas often overlooked by the industry, pursuing organic growth through drill-bit success. Our contrarian spirit is underpinned by technical rigor and discipline, and by our ability to develop projects safely using industry best practices and advanced technologies. As an ethical and transparent company, Kosmos is committed to doing things the right way to ensure that we are as good above the ground as we are exploring below it. We seek to create value quickly for all our stakeholders, including investors, employees and the governments and citizens of our host countries.

FPSO KWAME NKURUMAH
OFFSHORE GHANA, JUBILEE FIELD

1,082 feet long, 213 feet wide

Generating substantial cash flows to support Kosmos' future development and exploration programs

// HIGHLIGHTS //
DISCOVERY ON THE FRONTIER

- Founded in 2003
- Listed on the New York Stock Exchange (NYSE: KOS) in 2011
- Approximately 275 employees worldwide
- Basin opening discovery of Jubilee Field offshore Ghana in 2007
- First oil produced from Jubilee Field in 2010, a record 42 months from discovery
- First oil produced from Tweneboea, Enyenra, and Ntomme (TEN) fields offshore Ghana in 2016
- Basin opening discovery of Tortue gas field offshore Mauritania and Senegal in 2015
- Multiple follow-on discoveries offshore both Mauritania and Senegal in 2015-2017
- Large acreage positions with significant hydrocarbon potential offshore São Tomé and Príncipe, Suriname, Morocco and Western Sahara
- Active new ventures program seeks to identify additional exploration opportunities

// CORPORATE RESPONSIBILITY //
ADVANCING PROGRESS, ENHANCING LIVES

We help host countries plan for future success in managing hydrocarbon resources for the long term. We invest in building the capacity and skills needed to support a vibrant petroleum sector capable of creating economic opportunity that is widely shared. This approach is based on the values articulated in our Business Principles and an unwavering commitment to corporate responsibility that doesn't change with the price of oil, shifting political winds, or other trends.
