Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical facts, included in this presentation that address activities, events or developments that Kosmos Energy Ltd. (“Kosmos” or the “Company”) expects, believes or anticipates will or may occur in the future are forward-looking statements. Without limiting the generality of the foregoing, forward-looking statements contained in this presentation specifically include the expectations of management regarding plans, strategies, objectives, anticipated financial and operating results of the Company, including as to estimated oil and gas in place and recoverability of the oil and gas, estimated reserves and drilling locations, capital expenditures, typical well results and well profiles and production and operating expenses guidance included in the presentation. The Company’s estimates and forward-looking statements are mainly based on its current expectations and estimates of future events and trends, which affect or may affect its businesses and operations. Although the Company believes that these estimates and forward-looking statements are based upon reasonable assumptions, they are subject to several risks and uncertainties and are made in light of information currently available to the Company. When used in this presentation, the words “anticipate,” “believe,” “intend,” “expect,” “plan,” “will” or other similar words are intended to identify forward-looking statements. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond the control of the Company, which may cause actual results to differ materially from those implied or expressed by the forward-looking statements. Further information on such assumptions, risks and uncertainties is available in the Company’s Securities and Exchange Commission (“SEC”) filings. The Company’s SEC filings are available on the Company’s website at www.kosmosenergy.com. Kosmos undertakes no obligation and does not intend to update or correct these forward-looking statements to reflect events or circumstances occurring after the date of this presentation, whether as a result of new information, future events or otherwise, except as required by applicable law. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this presentation. All forward-looking statements are qualified in their entirety by this cautionary statement.

Cautionary Statements regarding Oil and Gas Quantities

The SEC permits oil and gas companies, in their filings with the SEC, to disclose only proved, probable and possible reserves that meet the SEC’s definitions for such terms, and price and cost sensitivities for such reserves, and prohibits disclosure of resources that do not constitute such reserves. The Company uses terms in this presentation, such as “total un-risked resource potential,” “total discovered,” “net un-risked mean discovered resources,” “net un-risked resource exposure,” “de-risked plays,” “defined growth resources,” “de-risked prospectivity,” “discovered resources,” “potential,” “gross resources” and other descriptions of volumes of reserves potentially recoverable that the SEC’s guidelines strictly prohibit the Company from including in filings with the SEC. These estimates are by their nature more speculative than estimates of proved, probable and possible reserves and accordingly are subject to substantially greater risk of being actually realized. Investors are urged to consider closely the disclosures and risk factors in the Company’s SEC filings, available on the Company’s website at www.kosmosenergy.com.

Potential drilling locations and resource potential estimates have not been risked by the Company. Actual locations drilled and quantities that may be ultimately recovered from the Company’s interest may differ substantially from these estimates. There is no commitment by the Company to drill all of the drilling locations that have been attributed these quantities. Factors affecting ultimate recovery include the scope of the Company’s ongoing drilling program, which will be directly affected by the availability of capital, drilling and production costs, availability of drilling and completion services and equipment, drilling results, agreement terminations, regulatory approval and actual drilling results, including geological and mechanical factors affecting recovery rates. Estimates of reserves and resource potential may change significantly as development of the Company’s oil and gas assets provides additional data.

- **The *Right People***

- ***Track Record:*** Contrarian thinkers who are serial oil finders with a proven track record of deepwater exploration success

- **The *Right Strategy***

- ***Discipline and Diligence:*** Identifying and accessing strategic opportunities in under-explored frontier / emerging basins with substantial hydrocarbon potential
- ***Success and Sustainability:*** Portfolio provides multiple basin / play-opening wells that on success will unlock substantial, de-risked, follow-on prospectivity

- **The *Right Financing***

- ***Financial Strength:*** Fully self-funded to execute exploration and appraisal drilling program through success

- **The *Right Opportunities***

- ***Kosmos 1st Inning:*** Portfolio that delivered >1 billion barrels gross in Ghana
- ***Kosmos 2nd Inning:*** Portfolio with the potential to deliver substantially more

- **The *Right Time***

- ***Kosmos is now poised to deliver transformational growth with 4 basin / play-opening wells scheduled over the next 18 months testing 4 billion barrels of potential gross resource***

The Challenge

Recent lack of international deepwater success and the steady growth of U.S. shale have driven investors to the North American unconventional sector

- **Current view of unconventional:**

- Low commercial risk
- Acceptable returns
- Predictable, long term reserves / production replacement and growth

- **Current view of deepwater explorers:**

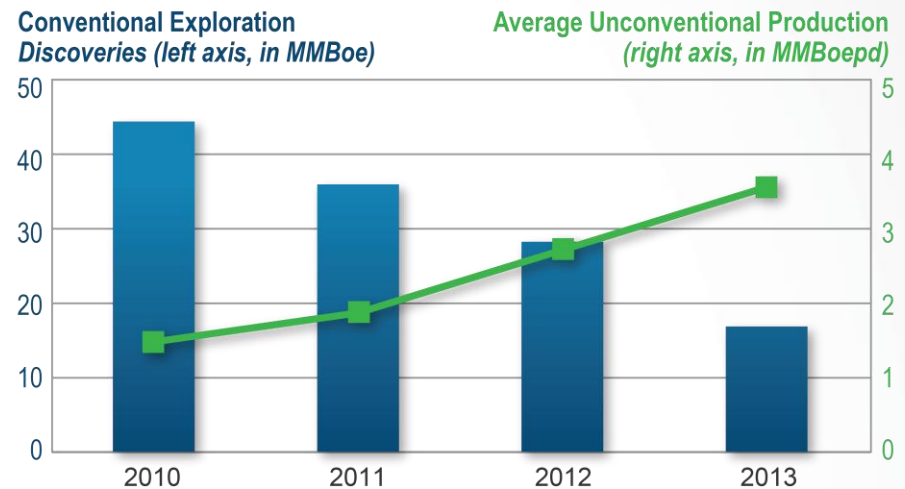

- Poor exploration success record
- Development delays
- Increasing costs

Relative Stock Performance
(in percent, rebased to 100)

Deepwater Explorers include: AFR, CIE, KOS, OPHR, TLW. Unconventionals include: CLR, CRZO, EOG, OAS, PXD

Discoveries and Production

The Opportunity

Kosmos focuses on the lowest portion of the deepwater cost curve to create differentiated value

- **Deepwater exploration can deliver sustained, industry-leading returns**
 - Kosmos “Second Inning” breakevens in \$40-\$60/bbl range
 - Average Shale breakeven of \$80/bbl
- **Key to maximum value creation is sustained delivery of high-value, high-volume barrels**
 - Requires repeated opening of new petroleum systems and dependable follow-on success

How is Kosmos Differentiated?

Proven and repeatable business model targeting high-volume, high-value barrels

- Focused Strategy**

- Identify and capture high-volume and high-value barrels

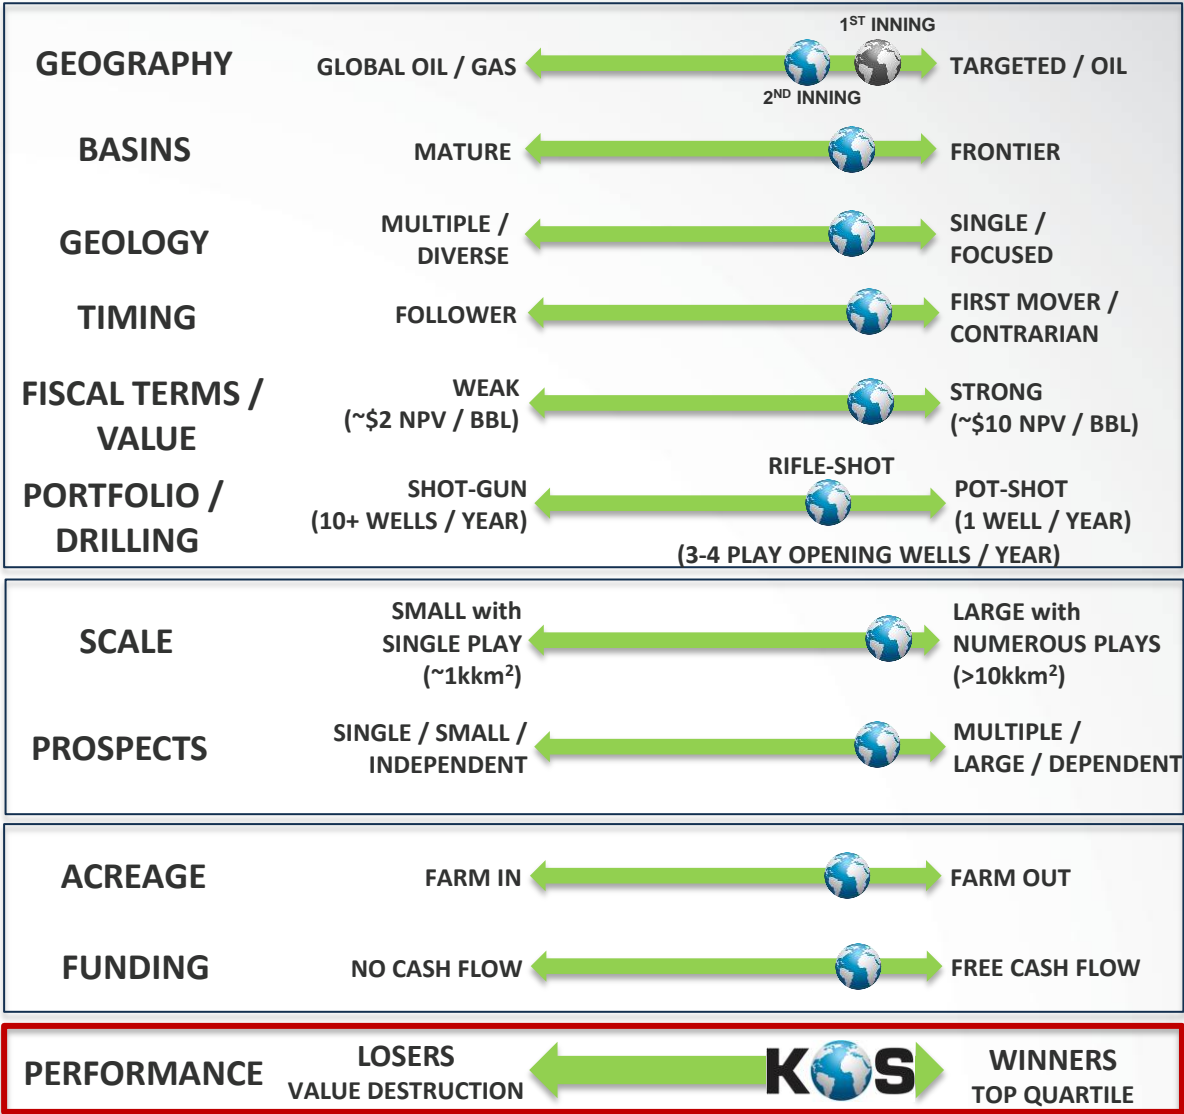

- Disciplined Execution**

- Manage risks to deliver early, sustained exploration success

- Self-Funding**

- Maximize flexibility and returns

- Delivers Performance**

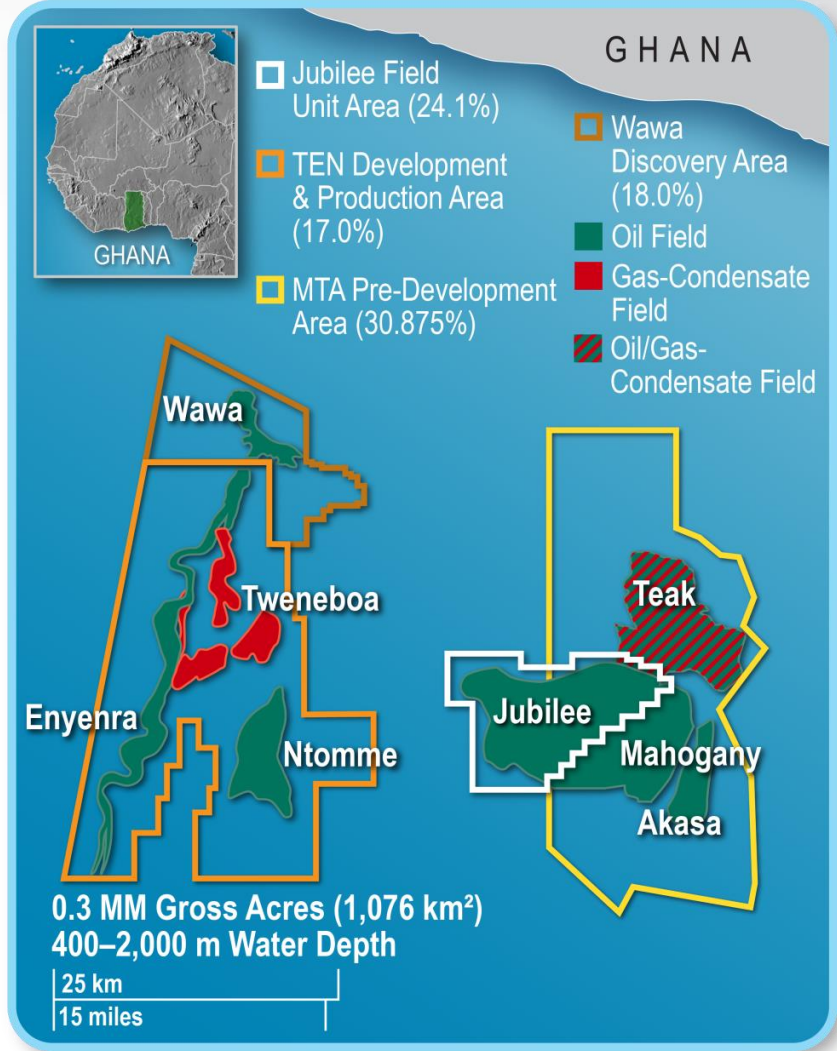

“First Inning” Exploration Success – Ghana

Success in Ghana resulted from a well-executed exploration strategy

- Focused on West Africa Transform Margin Cretaceous play
- Opened Tano Basin petroleum system offshore Ghana
 - Drilled 5 basin / play-opening wells with 20% success record
 - Delivered follow-on commercial success rate in Ghana of ~50%
- Discovered >1BBbl gross of high-value barrels

Ghana expected to deliver over 200 MBopd of production (gross) providing continued reserves, production and cash flow growth

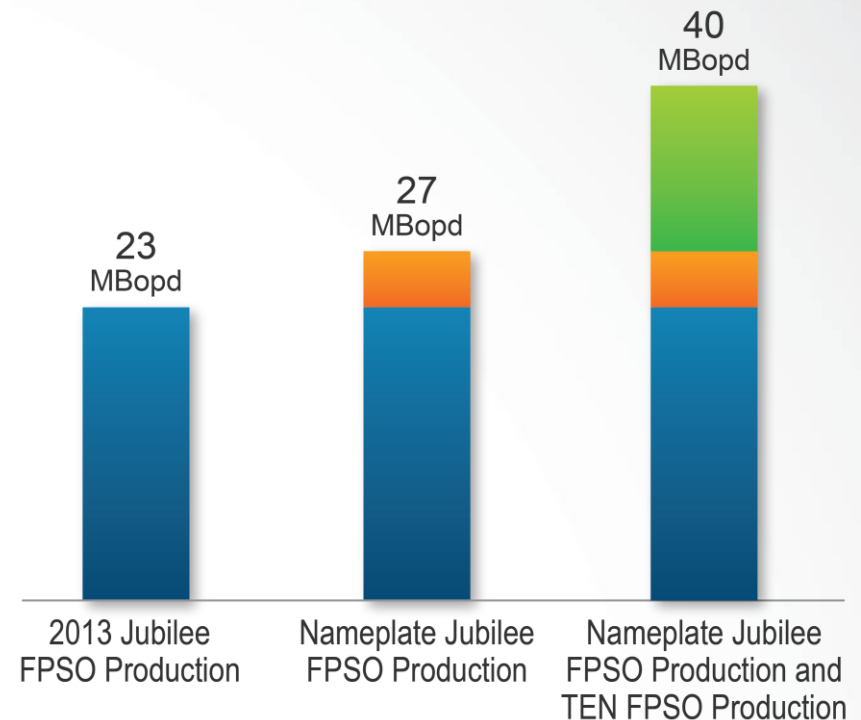

- **Growing Production**

- Jubilee FPSO debottlenecking (>120 MBopd)
 - Greater Jubilee (including MTA) long-term production plateau of 5-7 years
- TEN development
 - First oil expected in 2H 2016
 - Ramping production to FPSO capacity of 80 MBopd gross

- **Growing Reserves**

- 140% RRR at year-end 2013
- Greater Jubilee
 - Upon approval of PoD of future phases and MTA, additional reserves to be booked
- TEN
 - Initial booking anticipated year-end 2014

Substantial Net Production Growth

Self-Funded Explorer

Unique business model enables us to execute our strategy and provides a competitive advantage

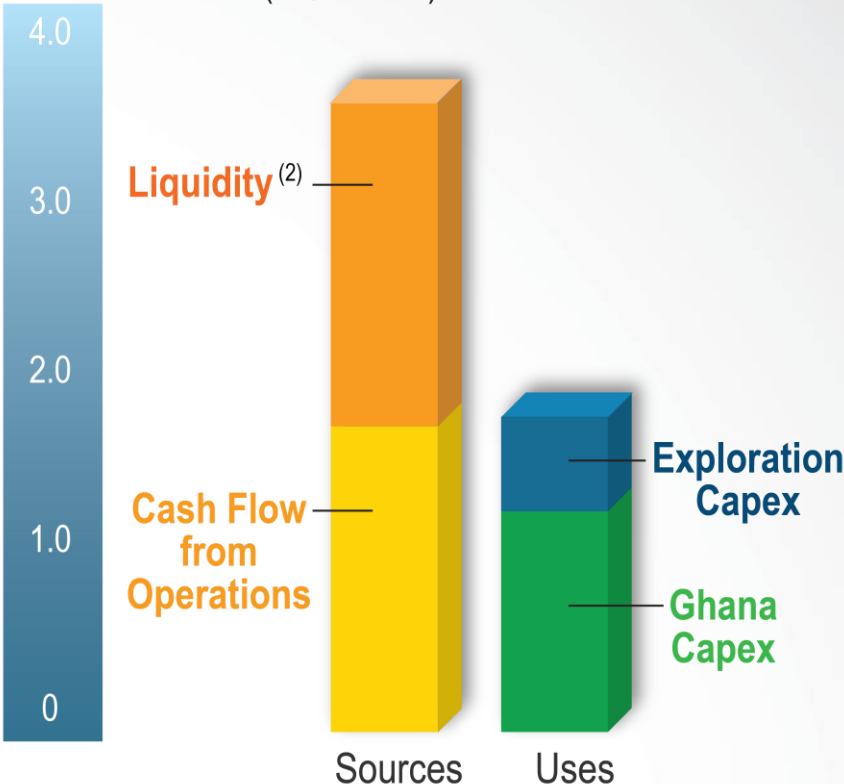

- **Strong cash flow generation from Jubilee**

- Significant cash margin due to first mover advantage

- **Disciplined financial management**

- Diversified sources of capital
 - Pro forma Q2 2014 Liquidity ~ \$1.9 Billion to fund success capital ⁽²⁾
- Strategic hedging program
 - ~10MMBbls hedged through 2016 with floors of ~\$85-\$90 bbl

2014–2016 Sources and Uses ⁽¹⁾
(in \$ Billions)

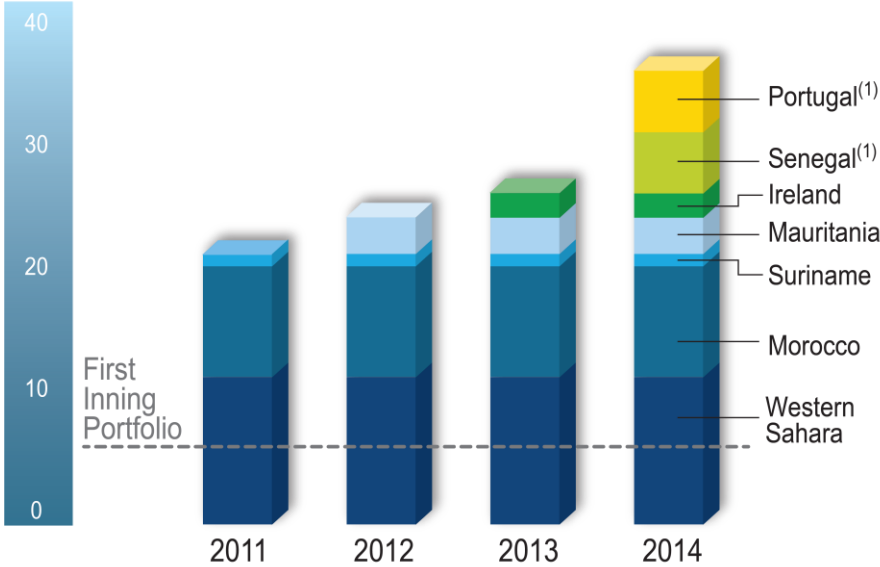

(1) Assumes \$100/bbl Brent and TEN comes online in 2H 2016; excludes new ventures and potential success capital.
(2) As of 6/30/14, pro forma 3Q \$300MM high yield offering.

Exploration “Second Inning”

Strategy being successfully executed to create an expanded “Second Inning” portfolio with substantial hydrocarbon potential

- Exported the core Cretaceous theme along the Atlantic Margin
 - Established an industry-leading position in Northwest Africa
- “Second Inning” portfolio continues to grow
 - Recently added positions in Portugal and Senegal
- ~37 BBoe of potential gross, unrisks inventory

“Second Inning” Exploration Potential (Unrisks BBoe)

(1) Pending final government approval

- “First Inning” Success
- “First Inning” Petroleum System Tests
- Potential “Second Inning” Petroleum System Tests

Near-Term Transformational Catalysts

Poised to drill 4 play opening wells over the next 18 months to test over 4 BBoe gross resource which, on success, would de-risk an additional 18 BBoe of identified, follow-on potential

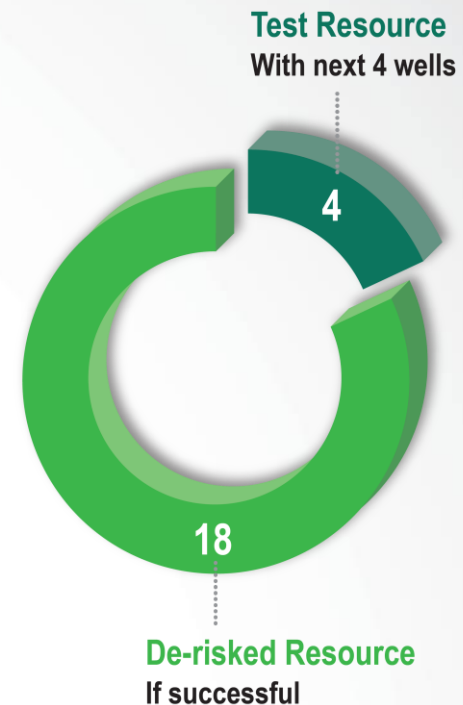

Play Opening Exploration Schedule

Prospect	Country	Pre-Drill Target Interest	Unrisked Prospect Pmean (BBoe)	
			Gross	Net
TOP 4 PROSPECTS				
Gargaa	Western Sahara	55%	1.0	0.6
Tortue	Mauritania / Senegal	60%	2.1	1.3
Orca	Mauritania	60%	0.3	0.2
Anapai	Suriname	30%	0.7	0.2
TOP 4 TOTAL			4.1	2.2

OTHER LICENSES

Multiple	Morocco	30%	High-grading prospectivity with drilling scheduled in 2016
Multiple	Ireland	30%	Post-3D prospect evaluation with drilling possible in 2016
Multiple	Portugal	31%	Seismic acquisition in 2015 with drilling possible in 2017

Tested and De-risked Gross Resource in Next 18 Months
(in BBoe)

Western Sahara – Aaiun Basin

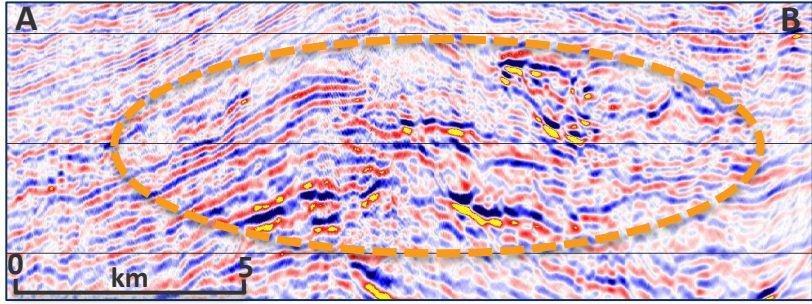

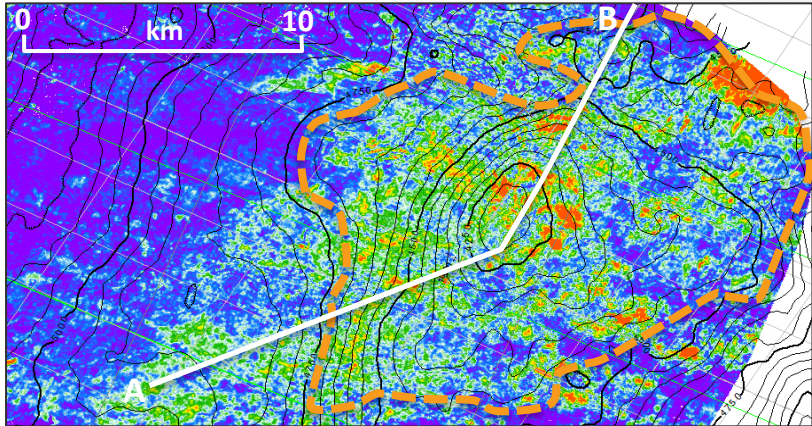

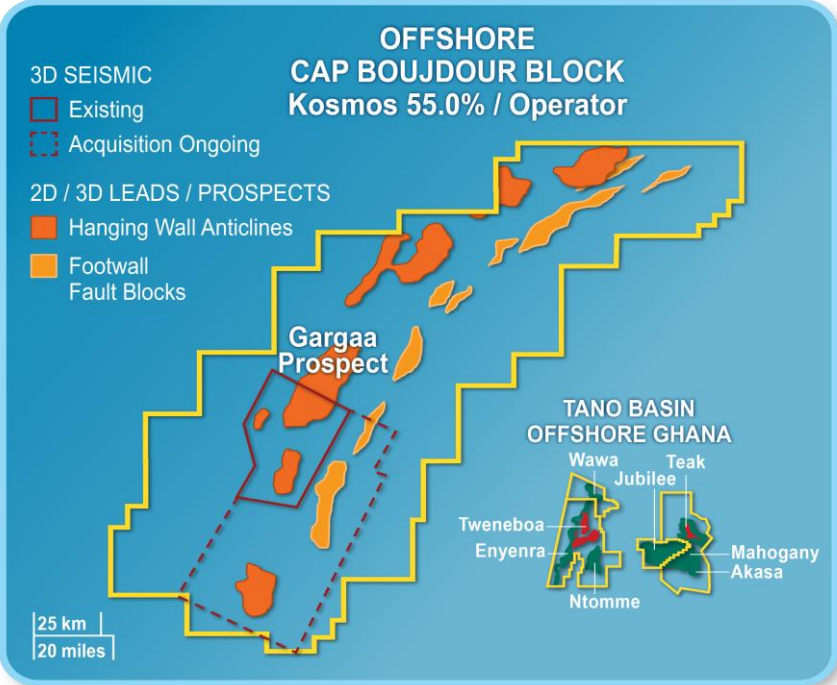

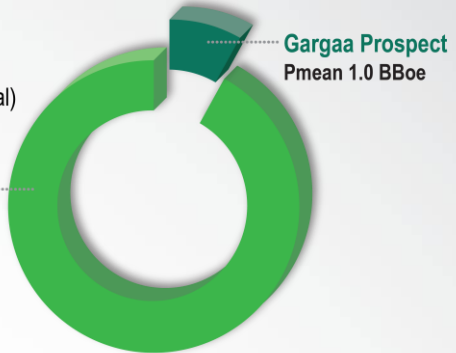

1+ BBoe Gargaa Prospect scheduled to spud late this year using the Atwood Achiever drillship

- ~22,000 km² position captures undrilled, Cretaceous age delta
 - 12+ BBoe potential in multiple plays / fairways
 - Strong evidence of reservoir and source
- **Key Prospect – Gargaa**
 - Stacked Cretaceous channels in four-way dip closure with AVO support

PROSPECT INVENTORY
(Gross Unrisked Resource Potential)

De-risked Follow-On Potential
Pmean 11.4 BBoe

16 Additional Leads / Prospects

Targeted Interval

Mauritania / Senegal – Senegal River Basin

3D seismic acquisition underway ahead of a potential play-opening well next year

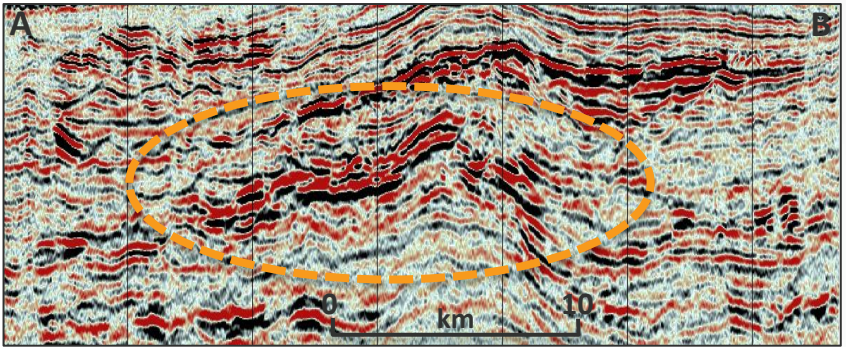

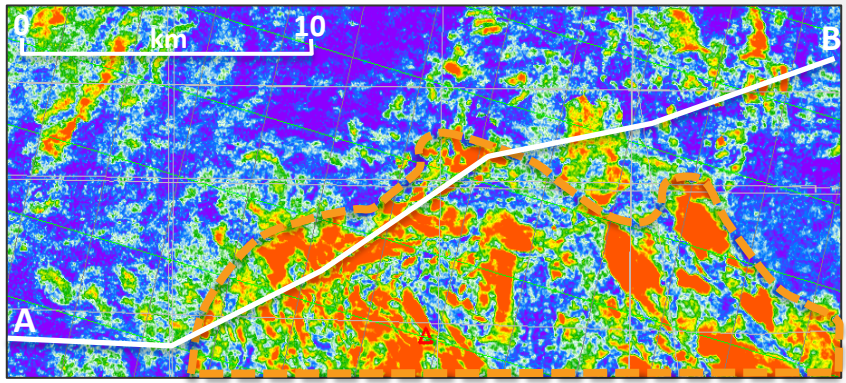

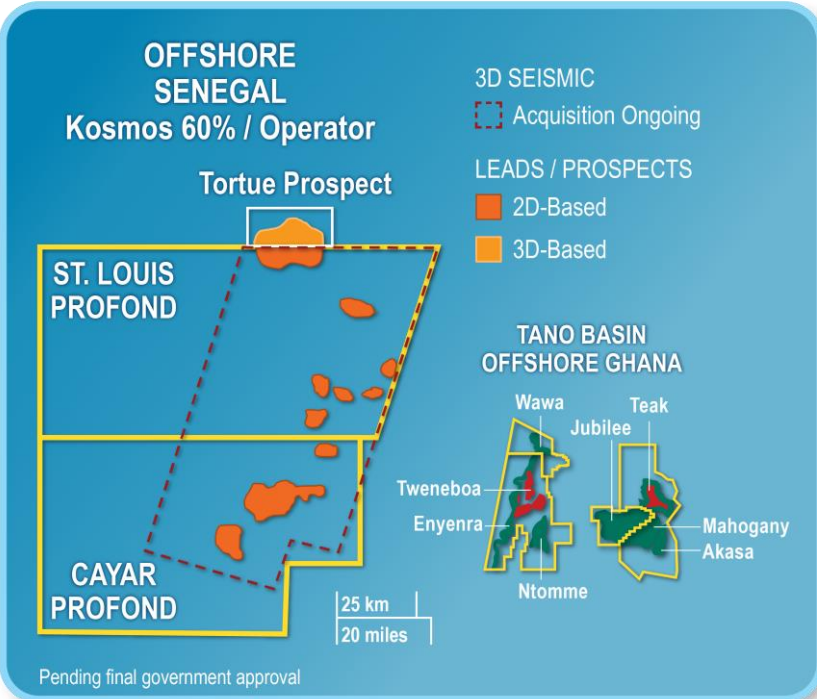

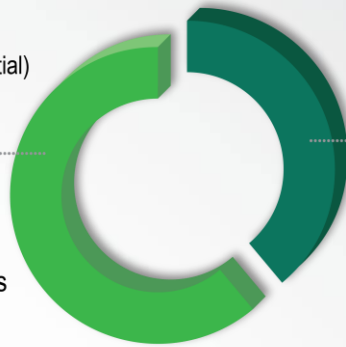

- ~18,000 km² position captures undrilled, outboard Cretaceous age, Senegal River petroleum system
 - 5+ BBoe potential in multiple plays / fairways
 - Proven sources and reservoir
- **Key Prospect – Tortue**
 - Cretaceous age fan with AVO support

PROSPECT INVENTORY
(Gross Unrisked Resource Potential)

De-risked Follow-On Potential
Pmean 3.3 BBoe

Tortue Prospect
Pmean 2.1 BBoe

8 Additional Leads / Prospects

Targeted Interval

Mauritania – Nouakchott River Basin

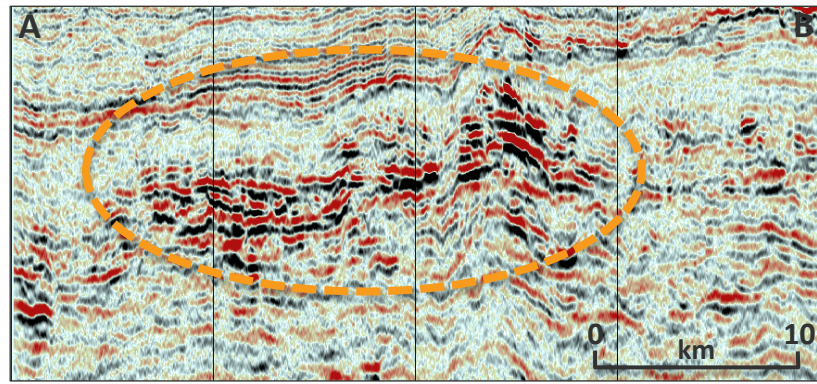

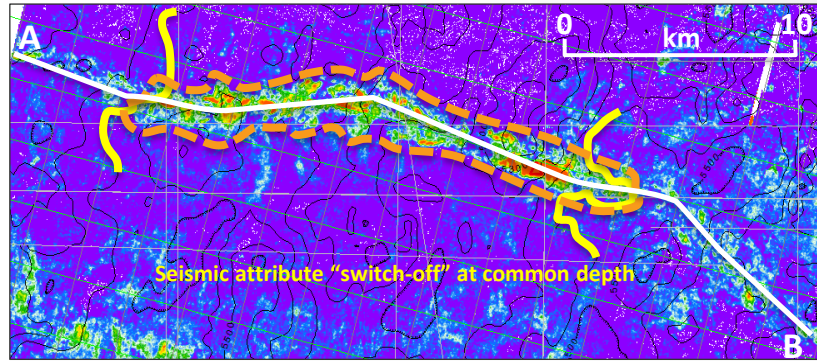

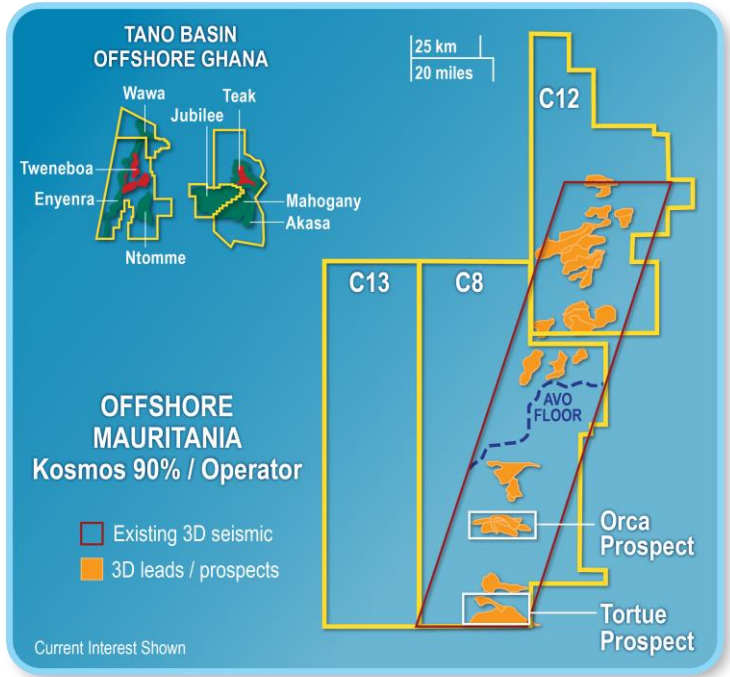

3D seismic completed, farm-out in process ahead of a potential play-opening well in 2015

- ~27,000 km² position captures undrilled, Cretaceous age, outboard Nouakchott River petroleum system
 - 3+ BBoe potential in multiple plays / fairways
 - Down-dip of proven working petroleum system
- **Key Prospect – Orca**
 - Stacked, Cretaceous age channels with AVO support

PROSPECT INVENTORY
(Gross Unrisked Resource Potential)

De-risked Follow-On Potential
Pmean 2.8 BBoe

8 Additional Leads / Prospects

Targeted Interval

Suriname – Guyana Basin

3D seismic complete and farm-out in process ahead of a potential basin / play-opening well

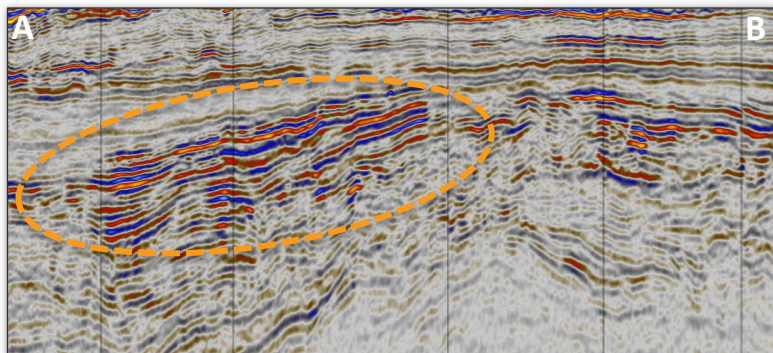

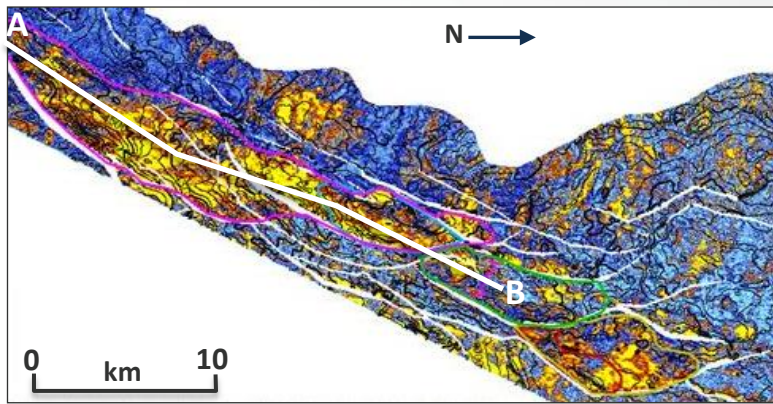

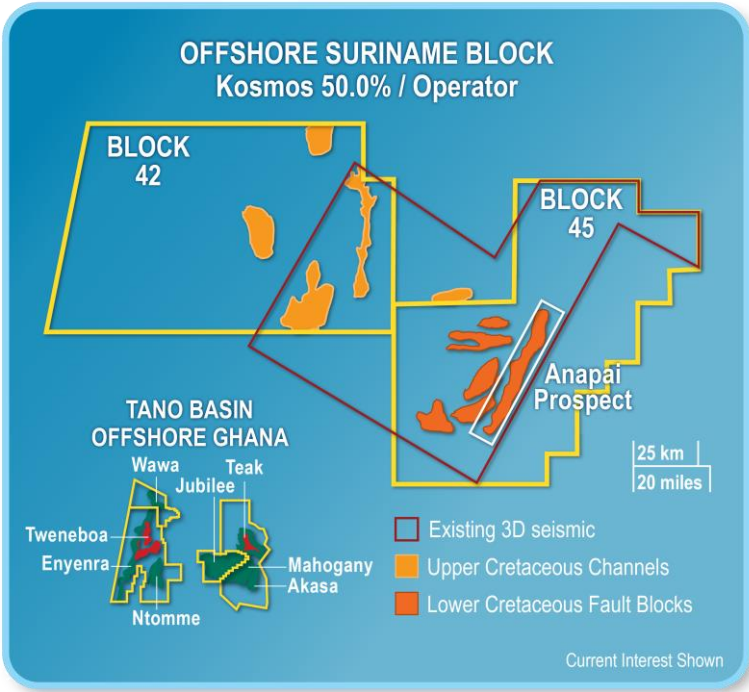

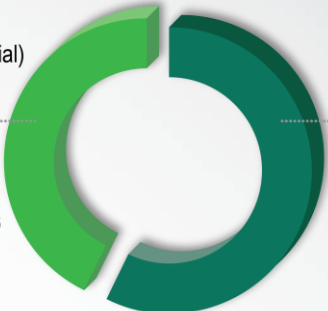

- ~11,000 km² position captures undrilled, Cretaceous-age, outboard Guyana petroleum system
 - 1+ BBoe currently identified potential in multiple deepwater plays / fairways
 - Down-dip of the producing Tambaredjo oil field
- **Key Prospect – Anapai**
 - Cretaceous reservoirs trapped in large, structural trap with AVO support

PROSPECT INVENTORY
(Gross Unrisked Resource Potential)

De-risked Follow-On Potential Pmean 520 MMBoe

Anapai Prospect Pmean 700 MMBoe

2 Additional Leads / Prospects
(Identified to Date)

Targeted Interval

The Right Time

Kosmos is poised for transformational value creation with a growing production base, large “Second Inning” exploration portfolio, strong balance sheet, and active play-opening drilling schedule

	2012	2013	1H 2014	Next 18 Months
Avg. Net Production (MBopd)	18	23	25	25+
LTM EBITDAX (\$MM)	\$484	\$657	\$807	\$800+ / year
Liquidity (\$Bn) / Net Debt (\$MM) ⁽¹⁾	\$1.1 / \$434	\$1.2 / \$249	\$1.6 / \$124	\$1.9 / \$131
Net Unrisked Exploration Exposure ⁽²⁾	0 MMBoe	150 MMBoe	108 MMBoe	2,200 MMBoe
Play Opening Wells	0	1	1	4
Stock Price ⁽¹⁾	\$12.35	\$11.18	\$11.23	?

(1) Liquidity, net debt and stock price as of end of period; Next 18 months liquidity and net debt as of 6/30/14 pro forma for high yield offering

(2) Excludes Ghana
