1. Kosmos' reporting boundary for environmental data is for operated production assets only. In 2022-2024, Kosmos' operated assets were exclusively located in the Gulf of America. During that time Kosmos also operated exploration blocks offshore Equatorial Guinea and São Tomé and Príncipe and, in 2023, assumed operatorship of the Yakaar-Teranga gas discovery offshore Senegal.

2. All waste in the Gulf of America is E&P waste which, by EPA guidelines, is considered non-hazardous. However, because E&P waste is considered hazardous waste in our other host countries, Kosmos reports E&P waste as hazardous waste.

3. Kosmos only has offshore operations located more than 5 km from the shoreline. Our reserves are not located in or near areas of conflict or in or near Indigenous land.
